Did You Know!

- That there's twice as many hardwood trees in the USA now....
 - As there was in 1952!
 - That our forest cover over...
 - 1/3 of all the land area of the USA!
 - That despite a 165% increase in population...
 - There is the same amount of forest now as there was in 1920
 -
-

Did You Know!

- That
 - 37% of our forest lands are reserved from harvest
 - That every year more Hardwood Trees are growing
 - Then the number that are harvested or lost to fire/insects/disease
 - That there are more than
 - 4.8 million trees planted every day
 -
-

Did You Know!

- That if we stopped growing hardwood trees, and we continued harvesting as we are...
 - We'd still have hardwood trees 75 years from now
 - That over 96.5% of hardwood trees
 - Are grown in the eastern region of the country
 - That we are presently
 - Planting 6 trees for every one tree harvested
 -
-
